B. Content update history - Elaboration of the Content – Knowledge Landscape

The module was first developed and launched online on CEPOL’s Learning Management System in 2013 (17/2013/GB). The content description presented below is a comprehensive revision of the content description adopted in 2013.

The updated content is targeted at SIRENE Operators and its main goal is to set out a uniform training basis for SIRENE operators in order to ensure an adequate level of knowledge and skills among this professional group throughout the whole Schengen Area.
Chapter 1 introduces the Schengen Information System (SIS), while Chapter 2 covers the legal basis of SIS.

Chapters 3 and 4 are technical sections which describe respectively how the system holds data and the functionalities provided to end-users.

Chapters 5-11 are dedicated to SIRENE procedures, while Chapters 12-14 deal with various aspects of the operation of SIS.

Where appropriate, within a chapter, internal hyperlinks to other chapters are provided as well as external links (indicated with the icon ![](https://example.com/icon)). At the end of each chapter a list those external links to relevant resources, freely accessible on the web, is displayed. Users have the possibility to share content with colleagues, post comments and rate the content itself.

C. Diagnostic Self Evaluation: My progress

Users can test their own knowledge on SIS II at any time while using the online module through the My Progress section of the module. Test items, in the form of True/False questions, are pooled according to the recurring topics of the knowledge landscape. A random selection of the items will be offered to users every time they decide to take the self-test for each of the individual topics. Based on the outcomes of the self-test, users will receive feedback and reflection possibilities which enable them to increase their further professionalization in the domain of the module.

D. Glossary

The keywords and acronyms from individual chapters are listed together (in alphabetical order) in the online module and are provided to the user to aid the comprehension of the content.
