

CEPOL European Research & Science Conference  
“Preparing Law Enforcement for the Digital Age”  
8-10 June 2022  
Mykolas Romeris University, Vilnius, Lithuania

# **Policing in a Digital Age: a Balance Between Community-based Strategies and Technological Intelligence**

**Luís Elias**  
**Superintendent of PSP**  
**Professor at Higher Institute of Police Sciences and Internal Security**  
**Lisbon - Portugal**

# Summary

1. **State of the Art**
2. **TechPol and TechInt in the Digital Age**
3. **Community Policing: policing by consent**
4. **Intelligence Led-Policing and Community Policing**
5. **Privatization and Militarization: old/new trends**
6. **Discussion/Conclusions**

## Context

Globalization (Recassens, 2003)

Network society (Castells, 2009)

Liquid times (Bauman, 2007)

Risk society (Beck, 1992)

# From a VUCA world to a BANI world

BRITTLE, ANXIOUS, NON-LINEAR, INCOMPREHENSIBLE

# Pillars of Policing

## Aims of the Investigation

Our investigation seeks to answer the following starting question:

- ✓ Will it be possible to build-up an integrated approach between community policing, intelligence led-policing and technological policing?

# Digital Age

- ✓ **4.95 billion** active internet users (DataReportal, 2022).
- ✓ **4.28 billion** unique mobile internet users worldwide, representing around 54.6 percent of the global population (Statista, 2020).
- ✓ **4.62 billion** social media users around the world

# Global Organized Crime Index, 2021

The vast majority of the world's population (79.2%) live in countries with high levels of criminality, and in countries with low resilience (79.4%)

Most prevalent:

- ✓ human trafficking
- ✓ drugs trafficking
- ✓ firearms trafficking

(Global Organized Crime Index, 2021: 40-41).

# Global Organized Crime Index, 2021

- ✓ Close to **40% of the criminal networks** active in the EU are involved in the **trade in illegal drugs**.
- ✓ **40%** have a **hierarquical structure** and **60%** are **fluid structures**.
- ✓ **80%** use **legal business structures** for their criminal activities.
- ✓ **68 %** use **basic money laundering** methods
- ✓ **60% use violence** as part of their criminal businesses
- ✓ **60 %** engage in **corruption**

(SOCTA, 2021)

(IOCTA, 2021)

# Models of Policing

**Hot Spots Policing**

**Intelligence Led-Policing**

**Zero Tolerance**

**Community Policing**

**Broken Windows Theory**

**Evidence Based Policing**

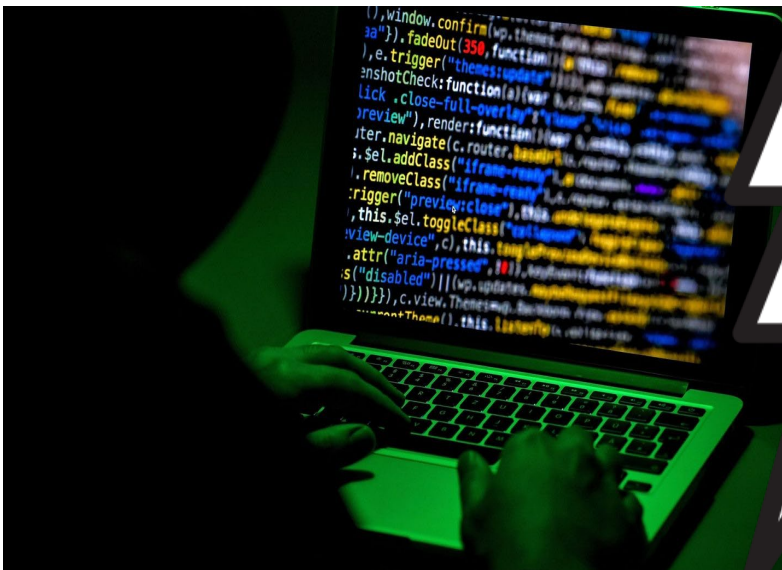

**Problem Oriented Policing**

**Predictive Policing**

# Militarization and hard policing versus community based policing versus privatization

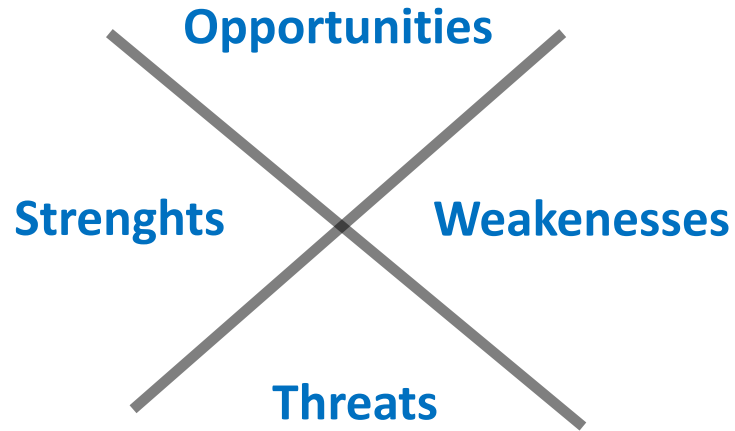

Techint versus Humint

# Tech Policing

# Emergent/disruptive technologies

**Dataveillance**

**Big Data**

**License Plates Reading**

**CCTV and  
Body Worn Cameras**

**5G Communication**

**Robots**

**Artificial Intelligence**

**IoT Connected Devices**

**Self-Driving Vehicles**

**Genetic editing and synthetic biology**

**Biometrics**

**3D/4D printers**

**Laser Weapons**

**(Nano) Drones**

## EU SURVEY

- ✓ 89.7% agreed or strongly agreed that AI should be used for the protection of children and vulnerable groups
- ✓ 87.1% agreed that AI should be used to detect criminals and criminal organisations
- ✓ 78.6% agreed that AI is used to predict crimes before they happen

# Community Policing

No academic consensus about Community Policing.

Disagreement about its advantages and disadvantages.

Almost all Police Agencies in Europe have already implemented similar programs.

# Community Policing

- ✓ 93.1% positively evaluated the attitude of the PSP police officers
- ✓ 69.6% considered it good or very good;
- ✓ 83.9% positively evaluated the ability of PSP officers to deal with security problems
- ✓ 52.2% considered it good or very good;

# Community Policing

- ✓ 72.2% positively evaluated the presence of PSP police officers at public areas
- ✓ 43.0% considered it good or very good;
- ✓ 81.4% positively evaluated the police response in urgent situations
- ✓ 51.3% considered it good or very good;

## Community Policing

- ✓ 80.9% of reported being familiar with the School Safety program;
- ✓ 77.5% reported being familiar with the Support Program for Victims of Domestic Violence;
- ✓ 55.6% reported being familiar with the Support to Elderly People.

# Intelligence Led-Policing

# Militarization and Privatization

## Discussion/Conclusions

An integrated approach between community policing strategy, intelligence led-policing, techint and humint, may be crucial to prevent and fight crime, to maintain a straight relationship with local communities and to improve the quality of police service.

## Discussion/Conclusions

- ✓ Prioritization of TECHINT may create an aseptic perspective of reality and increase bias in police and intelligence analyses.
- ✓ Devaluing of community policing and human intelligence (HUMINT) may generate distrust and lack of cooperation from the public
- ✓ Militarization of law enforcement has the potential to undermine citizen's reliance in justice and police

## Discussion/Conclusions

- ✓ Evaluation of policing models is fundamental
- ✓ Partnerships between Police and communities are a key condition for public's cooperation
- ✓ Police to be held accountable for the way they use AI and other emerging technologies and for the consequences of their use.
- ✓ AI should be used for the protection of children and vulnerable groups, and to detect criminals and criminal organizations

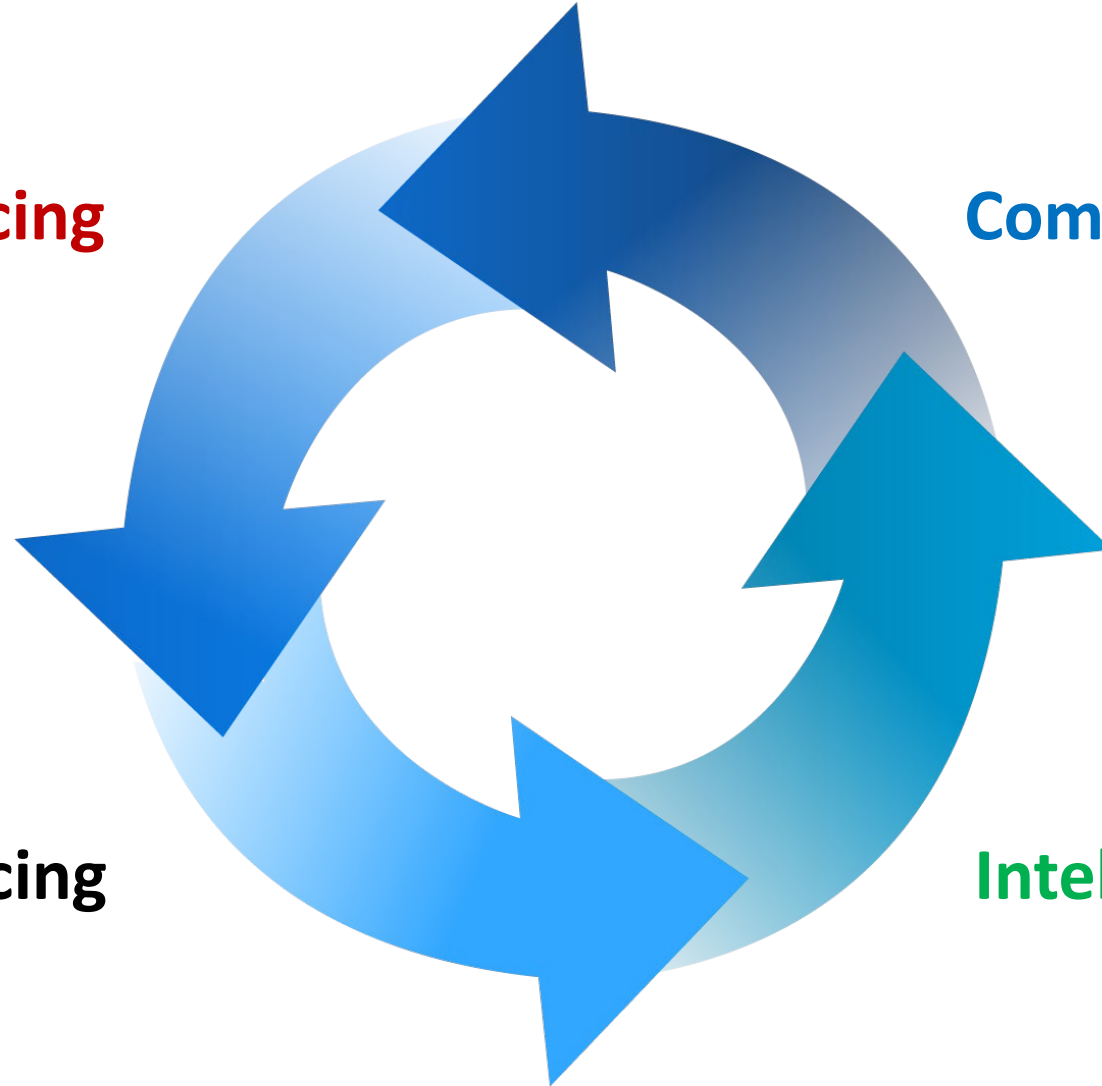

**Discussion/Conclusions**

**Technological Policing**

**Community Policing**

**Robust Policing**

**Intelligence Led-Policing**

**Thank you very much  
for your attention!**
