Answers to questions sent by potential tenderers

No.	Question	Answer
1	What should be the input shot? (the entire room or just a speaker)?	Input shot can be both: the entire room and just a speaker
2	The Image output should be for one camera only or for more cameras? What about the image cutting?, image in image?, animation during live broadcast?	There can be either one or several cameras, depending on the size of the events. Image cutting can be either image to image or animation during live broadcast.
3	We suppose the system should be closed, are we right?	The contractor needs to be ready to provide Cepol with both alternatives: a close and an open system.
4	How many events do you supposed to be stream during one year of Framework Contract?	Between 15 to 85.
5	What's the average duration of one such an event?	Between half a day to one week (i.e. 5 days).
6	How many users do you suppose are going to see the streamed event?	The target audiences will vary upon the events. The idea with the livestreaming is to make it available on our learning platform (e-Net) that has currently over 15 000 users.

7	<p>with reference to the tender in the object and to ANNEX X - CASE STUDIES and in particular to “Scenario 2: Production of an animated video to promote a CEPOL activity” we kindly ask you to confirm that the “animated video” can be considered as a video with animated graphics and no filming.</p> <p>If not, could you please give us a specific definition for animated video?</p>	<p>An animated video can be considered indeed as a video with animated graphics and no filming. However, Cepol would consider that a video with an animation as introduction followed by filming also as an animated video.</p>
8	<p><i>This question was arose after the information of the tender deadline was modified.</i></p> <p>Does it mean that we have possibility to ask questions as well?</p>	<p>Yes, please note that requests less than six working days before the deadline (17/05/2016) do not have to be answered.</p>
